

PROTECT OUR BOMB SQUAD BY LEGALIZING RADIO FREQUENCY JAMMING EQUIPMENT, SAYS CELLANTENNA TO HOMELAND SECURITY

CEO of CellAntenna Corporation Identifies Dangerous Situation to the U.S. Department of Homeland Security That Will Cost Lives if Not Acknowledged.

CORAL SPRINGS, FLORIDA—NOVEMBER 3, 2005—Howard Melamed, CEO of the CellAntenna Corporation, a leading provider of cellular communication solutions, is speaking out about the danger of Remote Controlled Improvised Explosive Devices (RCIED) and the need for radio frequency jamming equipment. Melamed has identified that according to Communications Act of 1934 established by the FCC, state and local government agencies and their bomb squads are not legally allowed to use radio frequency jamming equipment from the potential dangers of RCIED. Melamed has taken it upon himself to ask Secretary Chertoff and the U.S. Department of Homeland Security to consider the ramifications if the situation is not acknowledged. Melamed asserts that in order to prevent the loss of lives, state and local law enforcement agencies, especially bomb squad units, must also be legally allowed to use radio frequency jamming equipment as a weapon against terrorism.

Remote Controlled Improvised Explosive Devices such as cellular phone triggered bombs have recently been used by terrorists such as Iraqi insurgents. Melamed believes that it is imperative that the U.S. Department of Homeland Security move swiftly towards either asking congress to modify the Communications Act of 1934, or exert its own authority in these matters, and allow the use of this technology by state and local government agencies, especially bomb disposal units.

"As a nation, we cannot let bureaucracy get in the way of fighting terrorism. Secretary Chertoff and the Department of Homeland Security need to recognize the importance and gravity of this situation and how simple it would be to correct."

For additional information regarding jamming equipment, its uses and restrictions, or about Howard Melamed's campaign to legalize the use of jamming equipment by local law enforcement personnel, please visit www.cellantenna.com

About CellAntenna Corporation

Headquartered in Coral Springs, Florida, CellAntenna Corporation has more than 22,000 customers throughout the United States, Europe and South America. CellAntenna has experienced phenomenal growth, quickly becoming a multimillion-dollar e-commerce business. CellAntenna Corporation and its subsidiary, CellAntenna Limited, are the only companies across the globe that offer total engineered solutions for customers with cellular signal issues. In addition, CellAntenna CJAM signal jammers are sold to federal government agencies throughout the world. For more information go to: www.cellantenna.com.
